

Save on Electric Costs & Help Good Causes

The CT AFL-CIO's Union Energy Alliance

The CT AFL-CIO's Union Energy Alliance lets you save on your electric bill, without any changes to the service you now have. You get the same service from your current utility (CL&P or UI) -- they send out the bill and take care of any power outages. ***The only change is that YOU save – by choosing the Union Energy Alliance as your electricity supplier.***

Your Participation Also Helps Connecticut's Working Families

Through our discounted power program, two key labor-led nonprofits will receive funds to help them carry out their missions serving Connecticut workers.

- **The United Labor Agency** is an organization that helps working families in times of crisis through a variety of assistance programs.
- **GrowJobsCT** is a coalition that works with Connecticut businesses, community groups, and elected officials to help sustain jobs in our state and promote job growth.

Our grassroots approach means that advertising costs are low. The United Labor Agency and GrowJobsCT benefit from those savings in marketing, while you save on energy costs.

A Program Designed for Working Families

- **Our program is safe** -- you are not required to provide personal financial information or credit history. There are **NO** changes to your current electric service.
- **It is easy to participate** -- you only need to **enroll once**. You continue, as always, to make your payments to your current electric company.
- **There is no fee to join** and you may choose to opt out at any time.
- **You save without sacrificing service**. Your utility company – CL&P or UI -- will continue to maintain the lines, respond to power outages and be responsible for all service issues.

As membership in the **Union Energy Alliance** grows, we will use our combined strength to bargain for even lower rates. By joining now, you take immediate advantage of our competitive rates and help build our purchasing power to negotiate greater savings.
